

Academic Excellence delivered with Digital Technology- Camu for Schools

The quality of education depends on many factors in addition to academic content. The efficiency of processes, smarter and faster decision-making, the motivation of teachers, engaging and interactive learning experiences. Camu, a unified cloud - based campus management and learning management platform, brings all this together on a unified system. To ensure an efficient management of administrative and academic processes, without losing focus on teacher performance and student progress.

A mobile-based platform, Camu facilitates transparent and real-time information whenever you need it, wherever you are. Its intuitive, user-friendly design eliminates the need for intensive training. Its global and adaptive nature provides seamless integration with K12 institutions following any local board or international governing body such as International Baccalaureate, Common Core and IGSC, anywhere in the world. In addition to building engaging teaching and learning environments, Camu connects parents, students and teachers and fosters communication with each other.

Campus Management streamlines every process

Global changes are relocating the educational system from the physical to the digital space. The need of the hour is for a system that can bring together different departments, personnel, and processes into a cohesive, collaborative ecosystem. Camu can be configured to any multidimensional criteria to make your school efficient and effective. **It enables institutions to streamline processes, empower staff, collaborate across different departments, and align teams with strategic business initiatives.**

Camu can be configured to any multidimensional criteria to make your school efficient and effective.

Admissions

By taking the Admissions process online, Camu helps schools ramp up their enrolment goals. Entrance tests or interviews can be conducted using secure audio and video platforms. Assessments can be carried out on the mobile app and results instantly emailed or messaged to parents with digitised payment options to avoid payment delays. Camu streamlines the entire Admissions lifecycle with accuracy and efficiency.

Fee Management

Cash flows are the lifeline of an organisation and are always in need of urgent attention. Camu's fully automated Fee Management system offers a real-time view of outstanding balances and cash collections. The system can be configured to alert you of pending and recovered dues, as well as execute bulk actions pertaining to payment reminders and fee receipts.

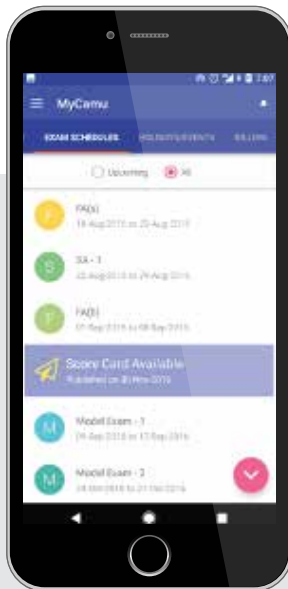

Payments

A dashboard instantly pulls up tabulated information on personnel and vendor payments which can be instantly authorised via the app. As all transactional data sits on the same system, cash flows can be projected, and funds checked for better fiscal control.

Payroll

Important HR processes including payroll processing and payslips can be scheduled, viewed online and receipts printed.

Learning Management System helps schools achieve academic excellence

Reports and analytics are an integral part of Camu and can be configured to your specific data requirements. This is instrumental in today's modern educational system where the onus of learning outcomes shifts from student to teacher. Analytics provide actionable insights which equip schools to implement remedial action without any delay.

Virtual Classroom

Camu Virtual Classroom is more than just a digital replica of your traditional classroom. It stimulates learning through engaging through tools and techniques such as video, text, images and online interaction. Real-time interaction facilitates communication beyond class hours allowing teachers to share information and clarify doubts instantly.

Staff Record

Camu enables schools to monitor staff attendance, performance, and feedback to ensure students receive the desired quality of education to achieve academic success.

Student Record

From personal information to academic progress, Student Records display their progress basis various parameters such as timely completion of assignments, test scores, attendance and absenteeism. Parents are given access to this information to update them on their children's progress and facilitate interaction with teachers.

Academic Planning

Camu's inventive Timetabling function tracks teachers' schedules to optimise staff planning for efficient resource management. Slots can be conveniently booked via the app.

Assignments

Assignments can be uploaded either as photographs or chosen from the pre-loaded library. The automatic feature computes the grades and sends the results to students. This does away with computation errors and saves faculty time.

Online Assessment

Online practice tests prepare students for real exams and help provide guidance and support to improve performance. Camu is a fully flexible system that supports any kind of assessment model or grading scheme - Competency based learning, Outcome based Education, Blooms Taxonomy based assessments and Criteria based learning.

Feedback

Feedback forms created on the fly and filled online by students helps to monitor and improve the educational experience.

Enabled by seamless collaboration across academic and administrative departments.
