Camu for Higher Education.

Pave the Way for Academic Greatness.

Technology is reinventing the educational system to deliver a new form of learning for students and better engagement for teachers, across the world. **Camu for Higher Education can transform your institution to a modern-day centre of excellence by creating a more engaging and individualised learning experience backed by seamless, streamlined administrative processes.**

Camu Outcome Based Education (OBE) and Camu Choice Based Credit System (CBCS) are two international pedagogy systems that focus on student learning and their choice of subjects as per interest, to enhance holistic development. These systems guide students to find their unique place in the professional world, and hone their competitive edge. Flexibility has always been one of the challenges faced by the traditional education system and Camu offers positive and impactful solutions in that regard.

> Flexibility has always been one of the challenges faced by the traditional education system and Camu offers positive and impactful solutions in that regard.
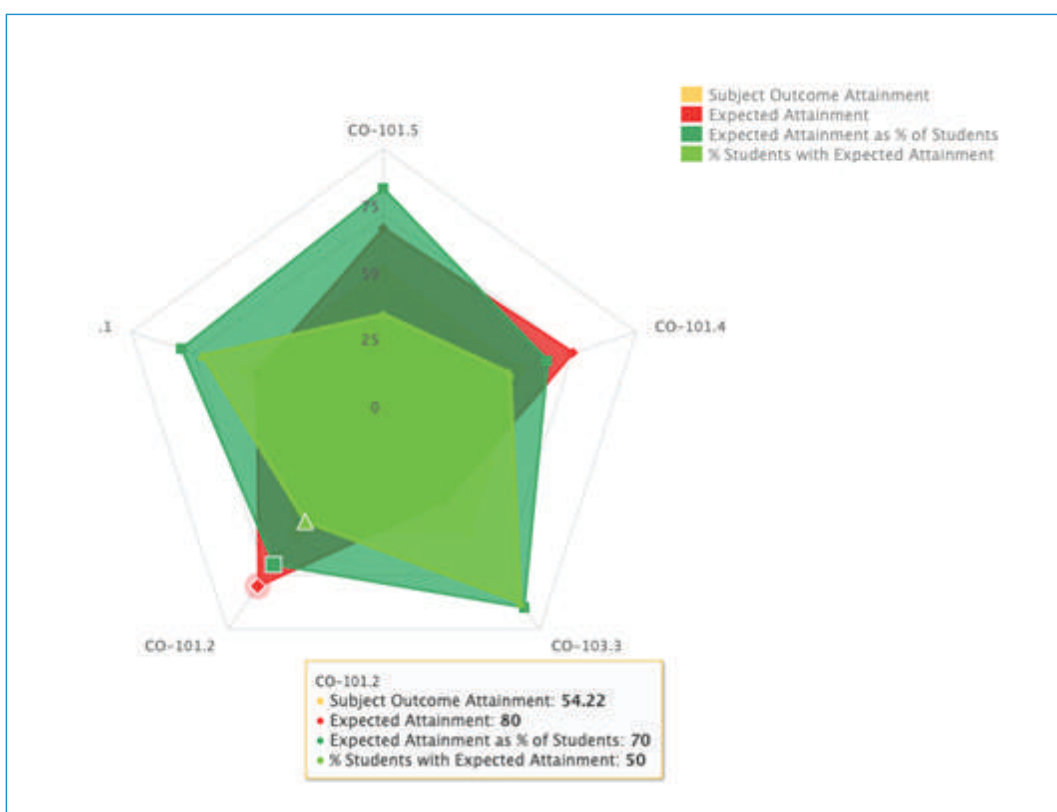

Camu Outcome Based Education
Achieve Scholastic Goals

Compared to the traditional approach that is teacher-centric, Camu Outcome Based Education emphasises on the learning experience. The curriculum is driven by the outcome students are expected to achieve at the end of the course and these are set to meet the real-life challenges. Curriculum Design, Curriculum Delivery and Assessments are driven by the learning outcome.
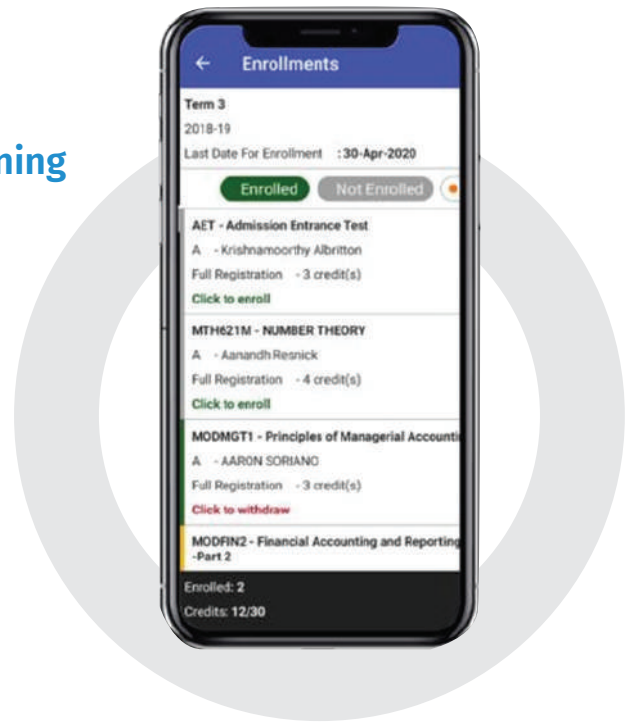

With future-ready curriculums, smooth curriculum delivery, flexible assessment models and real time tracking, Camu Outcome Based Education ultimately empowers students to apply academic knowledge to real-life challenges.

Camu Choice Based Credit System
Holistic Development through Flexible Learning

Camu Choice Based Credit System empowers students to curate their professional growth at the institution level by giving them the freedom to choose courses that align with their interests, ambitions and goals. Courses can be selected from the course offering organised by core, foundation courses, elective/minor and skill-based courses and others, to help enhance their holistic development.

A fully automated registration process offers a detailed view of course prerequisites, credits requirements and lecture schedules.

Automatic scheduling of Teaching Faculty, Lecture Halls and Time Tables simplifies planning and enables Academic Planners to manage their workload efficiently.

Dashboards display under-registered or in-demand courses and no-shows, enabling instant rescheduling of courses, to optimise faculty resources and infrastructure. Similarly, in demand courses can have extra schedules assigned.

Students can instantly select courses and pay for them in 2 minutes, to complete their enrolment.

Students and faculty are instantly notified of any changes in course schedules or cancellations.

To help institutions seek the highest level of accreditations, Camu delivers an integrated administration and learning solution. By being able to communicate and seamlessly share information with each other, Camu Integrated SIS & LMS avoids duplication of processes and ensures your data is always updated, to enable faster decisions.

Camu Integrated SIS & LMS offers the following benefits:

Automates several international and local accreditations.

Delivers Outcome Based Education that is critical for international rankings and accreditations.

Offers a unified data source for faculty and students, driven by mobile apps.

Offers visibility and transparency in the teaching and learning process.

CAMU FUNCTIONAL OVERVIEW

STUDENT INFORMATION SYSTEM

Course Definition	Enrolment	Academic Advancement	Academic Planning	Assessment / Examination	Survey	Student Attendance	Student Record	Remote Proctoring	Admissions
