A young woman with dark curly hair, wearing a yellow hoodie and light blue headphones, is sitting at a desk in a library. She is looking down at a smartphone in her right hand while holding a pen over an open notebook with her left hand. A pair of glasses and a stack of books are on the desk in front of her. The background is filled with bookshelves.

It's like carrying your college in your pocket!

Camu caters to the needs of the tech-savvy students of the future.

The new generation of students have clear expectations of their educational institutions. They want solutions that are simple and instantly accessible. They want their information clearly categorised into what the course offers, how many classes they should sit for, the credit requirements for graduation, and more. **They want important information to come to them in real-time rather than waste time navigating through a maze of departments. They do not expect to be hand-held; they just want clarity.**

Educational institutions that are yet to modernise and streamline academic functions are at a disadvantage, and this could impede their academic goals. To align to the new-age, tech-savvy mindset, they must leverage technology to offer a responsive and supportive system that meets their students' requirements and expectations.

Camu offers a simple cloud solution that makes every interaction with the institution a personalised experience. From application to registration to information and collaboration, students can access all functions via the MyCamu App.

Here's how Camu benefits students while offering an effective learning experience.

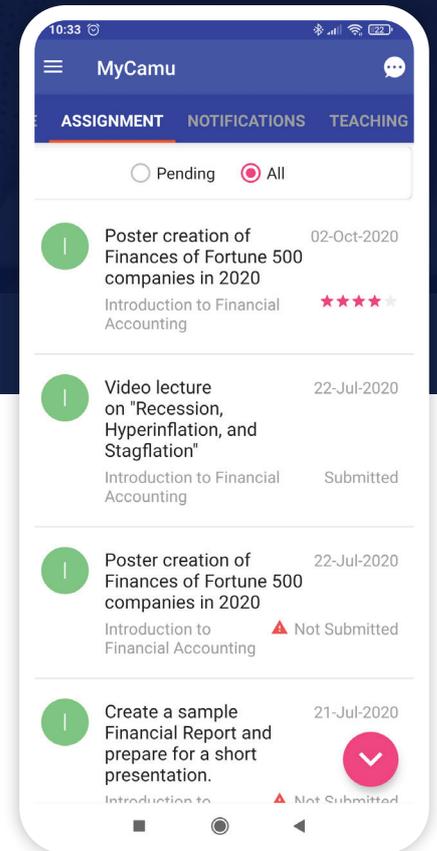

An Engaging Learning Experience

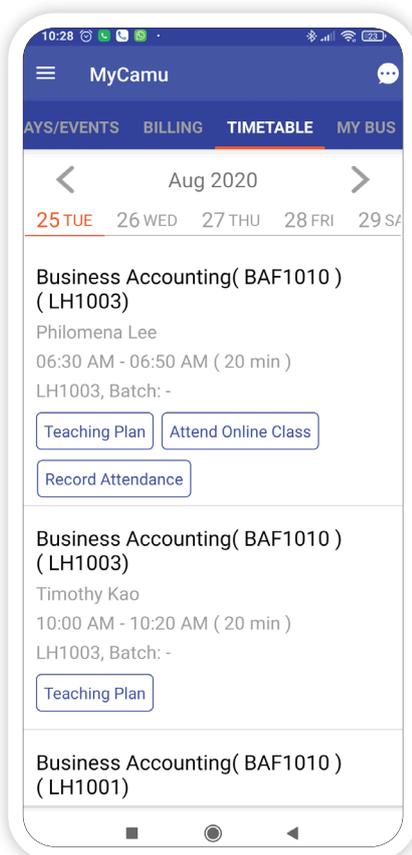

Preview the course ahead of the registration dates to evaluate your choices. Access assignments and feedback, lecture timetables and changes, and examination schedules and results, with real-time alerts. Communicate with peers and faculty for instant feedback. Camu keeps you ahead by keeping you in control.

Registration in minutes: Why stand in a line when you can register online! Only Camu lets you register via the app from wherever you are! And it gets even better - Camu displays the mandatory and elective course combinations, pre-requisites, and credit requirements. Students click and pay and the registration is confirmed instantly! Real-time notifications alert them in case of re-scheduled or under-registered courses, to help them alter their selection.

ASSIGNMENT

TIMETABLE

Timetables and Teaching Plans: Get your timetable in advance and attend classes from your mobile. Access Teaching Plans to help you visualise the process and expected learning outcomes, which will advance your learning trajectory.

Learning Material and Assignments: Faculty can upload textbooks, lecture notes and other relevant material for students to download. Students can upload their assignments and see the remarks and ratings of these and instantly communicate with the faculty for guidance.

Real-time Scores: The Internal Assessments function is designed to cater to any kind of continuous assessment model. The faculty can simply feed the marks into the app, which then automatically generates the computed assessment score and students see the marks in real-time.

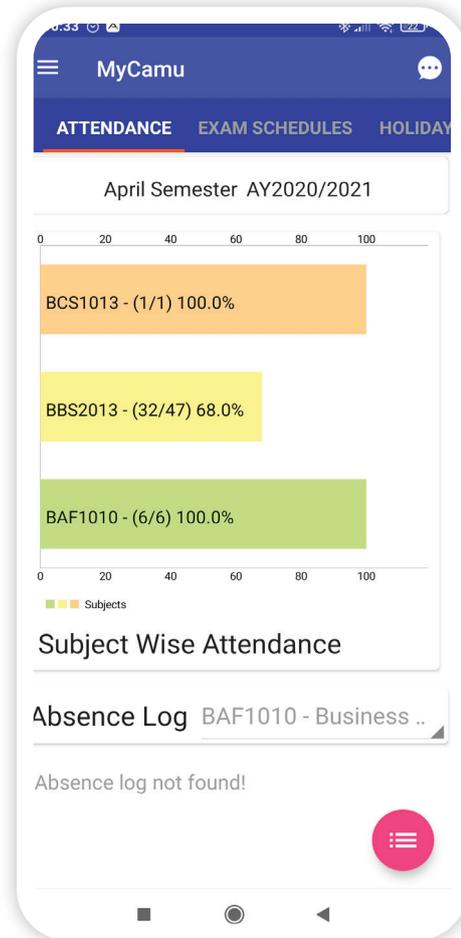

Booking Appointments: Students can book appointments with faculty to discuss their assignments, evaluate progress and clarify any learning doubts. This creates a personal connection between student-teacher and facilitates mentoring, **which in turn builds student confidence and academic excellence.**

Communication and Collaboration: Camu facilitates 2-way real-time interactions between student-faculty as well as student-peers through chat groups and a dedicated social media portal. Now students do not have to wait for class to clarify their doubts. **Instant interaction also facilitates group projects collaborations.**

Examinations: Be notified of examination schedules, examination number, and hall/seat allocation. The hall ticket can also be printed or scanned with a QR code depending on the institution's requirement. **Camu also offers a remote proctored online examination solution which combines AI-based and blended live proctoring, to allow students to take their exams in the comfort of their home.**

ATTENDANCE

Attendance and Leave

Application: A course-wise log helps students track and fulfill the minimum attendance requirements for the examinations. Students can also apply for long or short leave in case of emergency or health issues, to safeguard your attendance.

Camu also offers a remote proctored online examination solution which combines AI-based and blended live proctoring, to allow students to take their exams in the comfort of their home.

Student Services

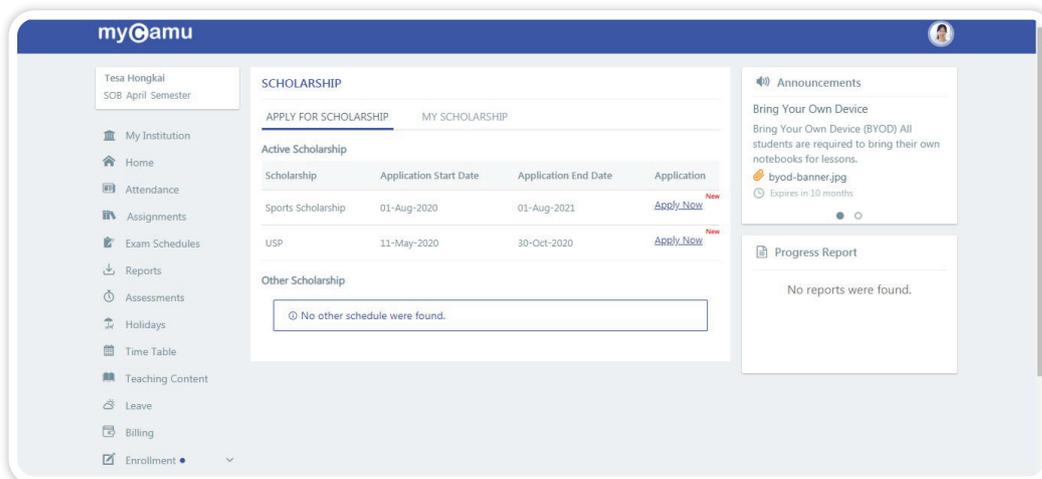

Education is not only about learning. Students need administrative support to fulfill their academic goals and Camu Student Services responds with unique intuitive and intelligent features.

Document Requisition: Transfer Certificates, IDs, Graduation Certificates, Domicile Certificates and other documents can be requested for and downloaded on approval. **Instant notifications reduces communication gaps and speeds up the process.** Students can also track the status of the request.

Student Records: Personal data such as change in mobile number, address and other details may be directly changed via the app without wasting time in any physical submission. **Health records may also be uploaded to keep the institution abreast of any medical condition.**

Instant Notifications: Rather than sift through a sea of irrelevant communication, students receive important announcements as soon as they log in, ensuring that important messages do not get missed.

Calendar: Placement drives, networking events, alumni meets, holidays and other important events are calendarized which makes scheduling easy.

Fee Management: Payments are fully automated and can be configured to include pre, post and part payment options for scholarships, sponsorships and staff children concessions. Camu provides a real-time view of outstanding balances so students can make payments directly from their smartphones or desktop.

My Bus: Students who use the institution's transport facilities can get notified of the route closest to them and track the bus location with GPS tracking.

Feedback: Students can provide continuous feedback on faculty teaching quality and provide suggestion to improve the learning experience.
