

Camu Mobile Solutions – A University in Your Pocket!

Learn, transact, access data anytime, anywhere.

The impact of a smartphone on society is unparalleled. With just a few clicks and swipes, one can shop for groceries, pay their taxes, book holidays, watch movies, read books, and even earn a diploma! This powerful technology has evolved from being a mere means of communication to a significant enabler in our lives, empowering every decision, and simplifying every action.

To this end, the Camu Mobile App seeks to synchronise a world of academic tasks, functions, information and resources into one accessible portal for students, parents, teaching faculty and management. Given the challenges that the COVID-19 pandemic has brought about, the Camu Mobile App serves as an even more valuable learning and development tool.

Let us take a look at how each stakeholder benefits from My Camu.

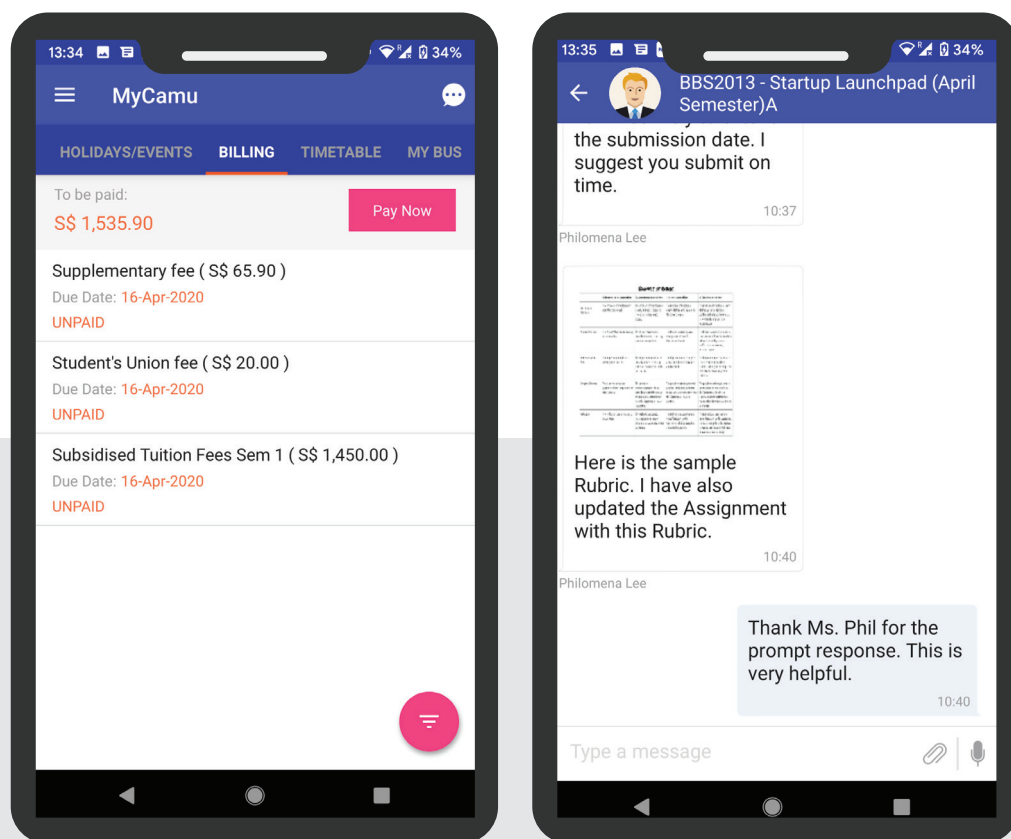

MyCamu App for Students

From orientation to graduation, and everything in between, Camu mobile helps students monitor, manage and maintain their academic lifecycles with proficiency. Be it, programme objectives or course credits, lecture timetables or attendance levels, assessment schedules or grading patterns, online enrolments or fee structures – all functions are rendered seamless and stress-free. Think of this as a student's portable life manager.

Features such as Digital Services can be used to place important requests for administrative items like ID cards and leaving certificates. Simultaneously, the efficient Assignment tab is fully functional with reference materials, detailed rubrics, and even a dedicated platform to upload the content as an A4 document or presentation.

The intuitive Message tab works like any other messaging app, enabling students to interact with faculty 24/7 for doubt solving and query management. Additionally, the Teaching Plan screen provides in-depth details into the subjects, units, subtopics, date of completion and other requirements. For those who have missed out on live lectures, recordings are available for perusing.

Simplicity, synchronisation, minimal effort and time; now, students have something that moves according to their unique pace!

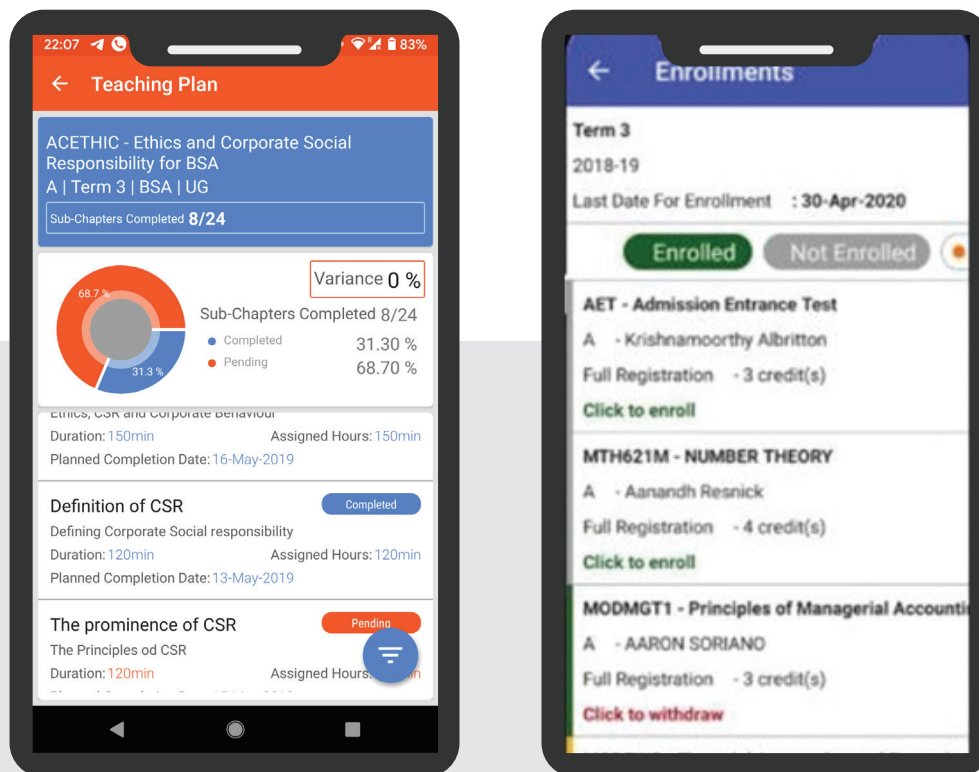

MyCamu App for Parents

Camu mobile instils a sense of confidence and ease in parents, granting them the means to check their child's progress online, and communicate with teachers via an interactive chat platform. From settling invoices to scheduling consultations, and even monitoring transportation routes, the app becomes the ultimate friend to parents. Plus, one need not log in multiple times to review each child's profile.

A feature like Institutional Info becomes especially handy for parents. It provides a comprehensive list of contact information (phone numbers, email ids) to turn to, from General Enquiry to Admission Office to Grievance Cell. The Appointment tab is another vital function that enables parents to book meetings with teaching faculty or other staff, programming the session based on date, time, faculty member, and purpose of visit. Another screen made available to parents includes Billing, the one-stop-shop for partial and/or full payments. Of particular significance is the My Bus feature that allows parents to track their kids' location, showcasing details like boarding points and arrival times.

From settling invoices to scheduling consultations, and even monitoring transportation routes, the app becomes the ultimate friend to parents.

Convenience, organisation, accessibility, and enhanced communication! Parents can breathe a sigh of relief with Camu mobile.

Camu for Teaching Faculty and Management

Camu mobile grants faculty the necessary tools and resources to simplify the entire teaching process by bringing together all knowledge related functions. Having one integrated Learning Management System and Student Information System enables a single harmonious unit, increasing cross-departmental efficiencies.

Faculty have access to a wide variety of dashboards such as Receipts Summary, Admissions Summary, Attendance Summary, Enquiry and more, granting them complete autonomy in academic governance. They can track their tasks efficiently through Task Management, and chat with other staff members through Message.

The Teaching Plan Tab allows the principal to view a pie chart of the collective departments, programmes, semesters and subjects. Not only can he/she track each teacher's progress (how much of the syllabus is completed), but can also monitor which rooms or laboratories are in use. The teachers can use the same tab to create subject-wise plans, mark attendance, update information, and more. Other important screens include My Timetable and Assignment, granting faculty the means to schedule lessons, curate assignments, correct exam papers, compute marks and provide feedback online.

Optimisation, speed, collaboration, governance –
Camu mobile can do it all!
