

Camu Learning Management System 2.0: Simpler, Faster, Better.

Let's face it. Distance Learning is here to stay and the world is coming to terms with it. It is creating new mindsets and new expectations which are **dynamic and evolving**. Institutions are realising that while their online enrollment have increased, so has the diversity in learning requirements. In such a scenario, it would not be justified to arm students and teachers with the traditional learning management system.

Camu Learning Management System (LMS), offers Institutions a central unified space for learning resources, content, assignments, assessments and grading tools. Instructors can develop course content and share instantly.

The key differentiator is Camu LMS can be used in an adhoc manner with full flexibility or alternatively be governed by the curriculum structure and the academic plan which is critical for HigherEd Institutions. Complete autonomy or governance or a hybrid approach, **anything is possible with the Camu LMS which enables the re-use of the course list and the course content.**

Designed with a difference

Institutions are governed by their own set of norms and processes. Camu LMS is a fully flexible platform which can easily operate as a flexible system or seamlessly operate based on the curriculum structure and the academic plan, which are critical for HigherEd Institutions. **Complete autonomy or governance or a hybrid approach – everything is possible. Camu LMS is designed for re-use of the course list and the course content.**

Camu LMS 2.0 is more than just a software; it's the epitome of pedagogy. A next-gen learning platform that offers an ultimate level of flexibility and re-use.

One place for all content

Instructors use a mix of teaching tools and collating these across several portals is overwhelming and time-consuming. **Camu LMS 2.0 allows Instructors to create engaging content with videos, images and text pulled together in a few clicks.** Be it the provision of an assignment, the creation of a quiz and poll, or the assimilation of classroom readings, actions such as designing, frame working, storing, editing, mining and transferring, enable multi-tasking with minimum effort. Bringing them closer to student success.

One place for better collaboration

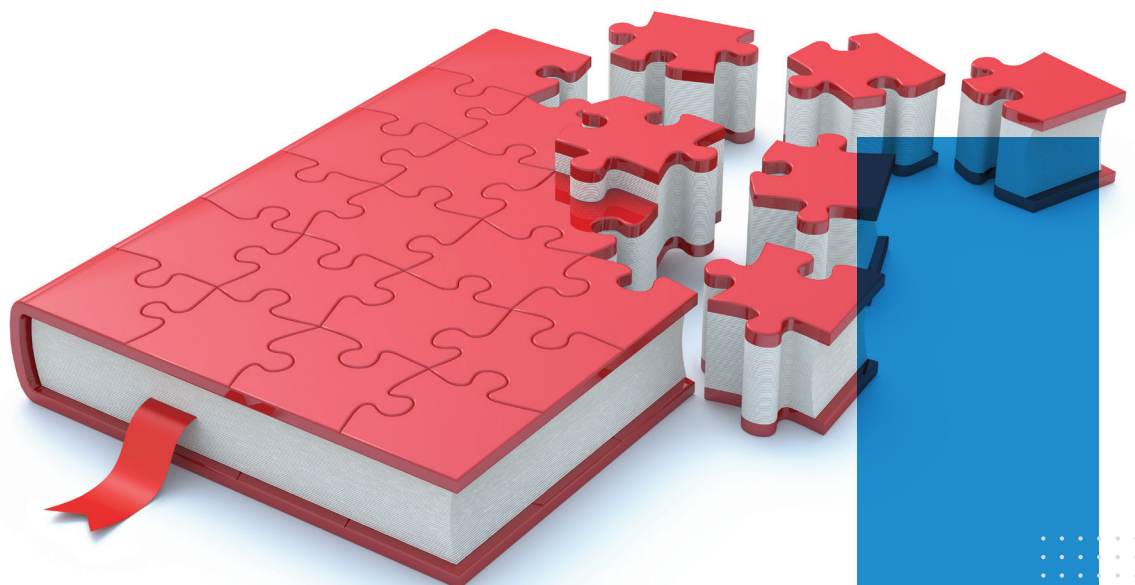

Camu LMS 2.0 connects learning goals with strategic plans and achievements, through a synergised and connected network. The idea is to offer Instructors support through instant connect every step of the way. **With a variety of discussion forums and chat groups catering to every aspect of the teaching and learning process stakeholders are granted contextual engagement.** Be it teacher-student, student-student or teacher-teacher collaboration, the platform enables two-way communication.

One place to share resources

A single location to store multiple resources. A singular login. Camu LMS 2.0 re defines speed and simplicity. Its Designed with accessibility, navigability and convenience in mind, which makes it easy to create and share diverse forms of content. This makes it possible for educators to consolidate and Disseminate easily.

One focus with a Mobile-First Approach

LMS 2.0 can be accessed from anywhere at any time, allowing Instructors the freedom and flexibility through the mobile app to review Students work, add assignments, take attendance or execute other tasks. Similarly, students can use Camu LMS 2.0 while travelling, commuting or engaging in any other activity. The learning experience thus becomes portable!

One Unified SIS and LMS

Camu offers the one and only unified comprehensive Student Information System (SIS) and Learning Management System (LMS), thereby offering an engaging learning experience and the ability to manage the student life-cycle without boundaries.

Similarly, students need not be glued to their laptops or PCs; they can use Camu LMS 2.0 while travelling, commuting, or engaging in any other activity.

- Forgoes the need for integration of data, as all resources are available in a single place.
- Is always accurately informed about the student lists, course offerings and lecture schedules.
- Builds the course, designs and customises content that can be re-used, avoiding the hassles of exporting and importing data before every term.
- Enables tasks such as attendance, assessment grading and feedback to be initiated just once and accessible everywhere.
- Links online assessments to the final grade automatically. Zero manual intervention is required.
- Allows learning outcomes to be measured automatically.
- Maintains a keen eye of learner progress and performance.
- Reduces the risk of losing important data.
- Is an ideal blend of an Enterprise Resource Planning System (ERP) and Learning Content Management System (LCMS)

Advantages of Camu LMS 2.0

Interoperability:

The open architecture enables integrations with 3rd party SIS systems.

Accessibility:

It enables appropriate users to access, use and distribute content.

Reusability:

The course codes and the course content can be re-used instantly from term to term. Simply provide the new staff plan the content is shared. No need to copy or upload and download.
